SUMMARY

AI Researcher specializing in agentic AI systems and LLM-driven solutions that reason, plan, and act across tools, data sources, and modalities. Experienced in building production-grade AI systems with focus on Agentic AI, Agentic RAG, Text-to-SQL, and OCR-based document intelligence. Strong emphasis on production readiness, scalability, and correctness. Proven track record deploying real-world AI solutions on AWS cloud infrastructure.

TECHNICAL SKILLS

AI & Machine Learning:

Agentic AI, LLMs, RAG Systems, Prompt Engineering, LangChain, MCP, Computer Vision, OCR

Cloud & Deployment:

AWS (Lambda, Bedrock, S3, API Gateway, EC2), Docker

Programming Languages:

Python, JavaScript, Java, C#, SQL

Focus Areas:

Production Systems, Scalability, System Architecture

EXPERIENCE

AI Researcher | Commit

2024 - 2026

- My Tadiran - AI Recognition:** Built the AI-based AC model recognition feature for My Tadiran app, winner of the 2025 Israeli Marketing Association Innovation Award. System identifies any AC unit in seconds, dramatically improving setup speed and accuracy for thousands of users across Israel.
- Smart OCR - Bank Document Extraction:** Developed a high-speed, high-accuracy document processing system that extracts critical details from bank documents. Combines advanced OCR with GenAI to intelligently parse and validate financial data, deployed in production handling real traffic.
- Text-to-SQL Agent:** Created an intelligent AI agent that converts natural language questions into precise SQL queries. Enables non-technical users to query complex databases using plain English, with automatic query optimization and error handling.
- Agentic RAG Platform:** Built production-grade agentic RAG systems with knowledge base integration on AWS. Fully deployed solutions handling real traffic with proper error handling, monitoring, and scalability.

Cyber & Signal Intelligence | Israeli Police, Lahav 433

2018 - 2021

- Served in critical roles within the Israeli Police Cyber and Signal Intelligence Unit and Lahav 433, specializing in cyber operations and signal intelligence.
- Developed expertise in telecommunications, cyber tools, and coding within the cyber unit.
- Contributed to national security efforts while developing technical skills and leadership abilities.

EDUCATION

MBA - Tel Aviv University (In Progress, 2025)

B.Sc. in Computer Science - Reichman University (2024)
